

**WIREFMCK**  
OSS

Small Teams & Individual Developers

Is a widely used OSS standard to build out API mocks

Straightforward API Mocking

**WIREFMCK**  
Cloud

Large Teams & Software Critical Businesses

Is a cloud platform to prototype, validate and serve API mocks

End-to-end developer acceleration platform

Why choose WireMock Cloud over OSS?

- Intuitive UI empowers everyone on the team.
- Easy, high scale usage and enterprise readiness.
- Rapid API prototyping with a mock-first approach.
- Keep alignment with OpenAPI contract testing.
- Guarantee prod resiliency with Chaos testing.

**WIREFMCK**  
Cloud

“...we can save a number of developer hours, not having to figure out how to host WireMock, how to protect it, how to define access controls, scale it, maintain it, and take on the burden of doing all of that...”

Kosta Krauth  
Head Of Engineering, Bilt Rewards

API Mocking Options

**WIREFMCK**  
OSS

**WIREFMCK**  
Cloud

Deployment and maintenance	Self-managed and self-maintained	Cloud hosted, automated, maintained and scaled by the WireMock platform
User Interface	Managed via scripts and code	Simple, accessible UI for technical and non-technical users
Scalability	Manually orchestrated and manually scaled	Hosted with unlimited scalability
Team collaboration	Individual developer only	Team collaboration and RBAC
User Management	Individual developer only	RBAC, SSO
K8s support	No k8s-specific implementation	K8s-native platform distribution
Security	No out of the box mock security	Header-match, HTTP basic, OpenID Connect
OpenAPI / Swagger Importing	Not natively supported	Swagger, OpenAPI, WireMock OSS import
Validator to alert in case of discrepancy between the mock and the API specification	Not supported	Drift detection with soft and hard validation
Chaos Engineering Module	Not supported	Multiple chaos modes
Mock-based API prototyping	Not supported	Collaborative interface to mock APIs that will generate open API spec and internal documentation portal
Mock processes	Running process per individual API mocked	Hosted with unlimited scalability
Performance metrics dashboard	No metrics available	Visibility into usage and performance
Mock API templates (Public as well as private Mock templates library)	No UI or templating	Thousands of public templates as well as ability to create company private mock templates
Support	Community Support	Enterprise Support including guaranteed SLAs
Git Integration	Not supported	Supported
Import data from CSV files to be used by the mock	Not supported	Coming Soon

Benefits of WireMock Cloud

“Since it runs in the cloud, we don’t need to invest in maintenance and infrastructure.”

Sergio Rubio  
Quality Assurance Specialist, Agibank

...having a hosted WireMock Cloud experience that has an easy user interface, access controls, integration with our SSO provider – it was really helpful so that we can just get started and start using it without having to do all this pre-work.”

Kosta Krauth  
Head Of Engineering, Bilt Rewards
